

## Year 8 Homework Project One:

### Computer Viruses

**RESEARCH** You are to undertake some research into computer viruses, you can use any sources of information you like (books, internet etc).

The information you need to find is:

- What are viruses?
- How do viruses work?
- What can be done to prevent viruses damaging your PC
- Also find some suitable graphics

### **INFORMATION POSTER**

Now that you have gathered your research you are to create an information poster which would be suitable to place in the school office to make the administration staff more aware of viruses and how they could protect themselves against them.
