**SCENARIO**

A local farmer, John Mitchell, has a caravan park development on his land. Having recently expanded the site he has decided that it may be helpful to use computers for administration and also to help further enhance the image of the park.

He has come to you for help with a number of tasks.

MAP TASK

The caravan park has had several new facilities installed during the winter closure. The current site map was hand drawn and photocopied. Now Mr. Mitchell would like a new map drawn on computer. He has sketched out a map of the park that will be used as part of the 'Welcome' pack handed to visitors as they arrive.

Use the graphics facilities of your computer to produce a neat copy of the map following the instructions printed below. Save as **MAP**. Print a hard copy.

- Toilet block should be a perfect square
- Pond should be an ellipse
- Swimming pool must be a perfect circle
- Reception block and play area must be rectangles
- Caravans must be identical shape/size and shaded grey
- Road should be suitable thickness and the label displayed as shown
- Choose a suitable font and one other form of emphasis for the title
- All labels should be within shapes

Marking scheme - The Heys Caravan Park - Map Task

Using pre-defined shapes

Square	1
Ellipse	1
Circle	1
Rectangles	2
Caravans, shaded & identical	2
	(7)

Lines

Road a suitable thickness	1
	(1)

Text

'ROAD' rotated	1
Title - capitals and emphasised by either size or bold	2
All labels within shapes	1
	(4)

Accuracy

All labels spelt correctly (-1 for any error)	1
	(1)

TOTAL   13
